

# TOP SECRET: BIA

Mission: SDSC Takedown

Agent: Leslie "Artemis" Nelson

Location: SDSC-BBB America

After Action Report:

This mission went incredibly smoothly. I was able to extract all the sensitive information from SDSC from both incompetence and malicious behavior. I posed as an employee who didn't have the knowledge to be in the field. I managed to severely limit their company.

In addition, the collective group that I discovered seems to be thriving. Our sleeper cell now has the capability to take out any corporation that threatens the national interests of Belgium. We treat every day like the world cup, but we aren't getting second.
